

DPS

BATTERY PACKS

DPS 10 IntelliPack – Hi cap
Contains two SLA 5 Ah Batteries

DPS 20 IntelliPack – Lo cap
Contains two SLA 3.4 Ah Batteries

Description

The DPS IntelliPacks include a sturdy steel case and the customer's choice of powder coating color and railroad identity stamped on the lid. The lids last much longer than aluminum lids are more resistant to bending. The IntelliPack features an advanced electronics module.

Features

- Advanced Electronics Module provides EOT charge unit data directly related to the charge remaining in the batteries
- The microprocessor reads the voltage of the batteries and converts the voltage level to charge unit data for the EOT
- Provides a gauge of remaining service time based on the actual state of charge of the batteries which is far superior to basing the charge units on time alone
