

DPS 600 Intellitender II Charger

Description:

DPS 600 IntelliTender II is a battery charger with a built-in conductance tester for charging IntelliPack and SmartPack ETD batteries. The unit is specially designed to charge SLA (sealed lead acid) batteries. It features three status LEDs on the front panel:

- Green** = Ready, Indicating the charge cycle is complete and the pack is ready for service
- Yellow** = Charging cycle is complete and the pack is ready for service
- Red** = Defective, Indicating a defective pack in need of repair

Features:

- Sturdy steel case with heavy duty rubber pad so the pack can sit on the top of the charger
- Sturdy and easily replaced charging cable
- Hi/Low switch sets the pass/fail point for the high and low capacity batteries
- Charging circuit does not require calibration
- Designed to daisy chain to additional chargers
